

1. Before installing, first check to ensure you have received all the package contents.

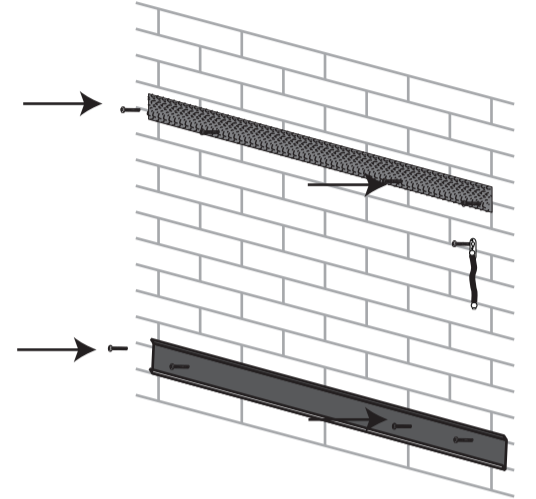

2. Verify the wall is prepared correctly for installation. Determine the type of screws or bolts needed for the wall surface you are mounting to. Drill holes into the mounting strips. The holes should be drilled at the location that is best for the installation of your MirrorVue.

Then, install mounting strips to the wall. Ensure the mounting strips are securely fastened to the wall. **(Note: It is the installers responsibility that all electrical, audio/visual, and framing construction is code compliant.)**

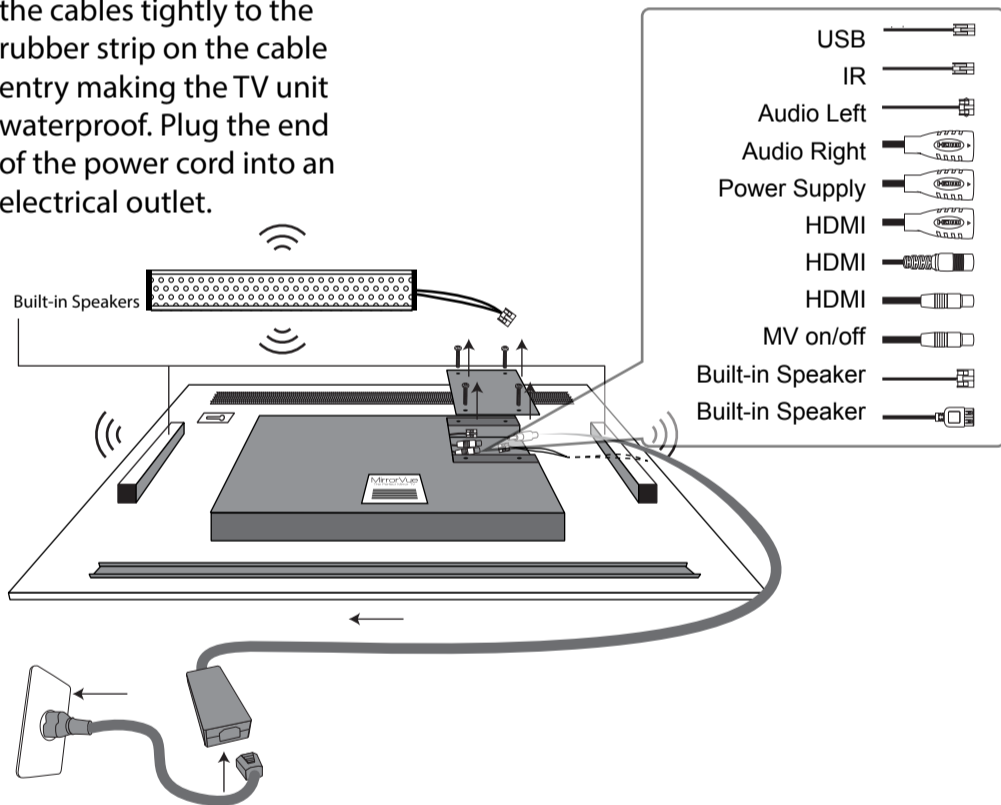

Install the strips of Velcro. Make sure to reinforce the Velcro to the wall by adding screws or bolts through the velcro surface and into the wall.

Lastly, install the security chain to the wall. Do this by locating first where the security chain is placed on the backside of the MirrorVue and then locate the matching portion to the respective location on the wall.

3. Lay MirrorVue facedown on a flat padded surface to connect the cables to the ports. When doing this make sure that the mirror glass is protected. Connect the cables to the ports in the waterproof cable entry, located on either the top or bottom of the TV housing. This location depends on the TV screen placement in the mirror. The type and/or quantities of each cable port may vary due to customers' request and/or country destination for shipment.

Once you have connected the cables to the ports, close the cover piece to the waterproof cable entry. The rubber strip on the cover piece will secure the cables tightly to the rubber strip on the cable entry making the TV unit waterproof. Plug the end of the power cord into an electrical outlet.

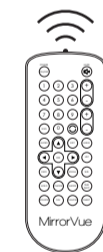

4. Using the Waterproof Remote Control "test" the MirrorVue to make sure all is functioning properly. Stand approx. 3 feet from the mirror and point the remote (IR sensor facing mirror) at the area above the TV screen location to turn on your MirrorVue.

(Note: Testing all electrical connections and functionality of the product fully before mounting MirrorVue to the wall is strongly recommended).

Waterproof Remote Control

5. Hang the MirrorVue TV. Lift the MirrorVue and securely engage the mounting strips and velcro material that are attached to the backside of the mirror to the mounting strips and vecro material on the wall. Please do not forget to connect the security chain piece that is on the back of your MirrorVue to the piece attached to the wall.

(Note: It is recommended that 3+ persons assist in the installation of MirrorVue).

6. Enjoy your new MirrorVue!
